BEFORE

AFTER

Although named as FC Bookbinder, book binding isn't the only service that takes place through the doors of these welcoming premises. Italian brothers Fabio and Roberto run separate parts of the business, Fabio taking control of the book binding and book restoration, and Roberto running his web design business along with the print shop and a VHS to digital conversion service. Fronting the business itself is also a fantastic coffee shop, serving freshly brewed Italian coffee Lavazza.

FC BOOKBINDER & BOOK RESTORATION

Making life easier for students, FC Bookbinder can offer printing and binding all under one roof. They can also reliably deliver the bound pages to Swansea based universities and colleges - a

particularly useful and popular service for those studying in Swansea but live outside of the area. Fabio is also fully trained in book restoration. Accepting books from all over the world, he uses patience and care in restoring every book to its former glory. From traditional techniques to the latest technology, Fabio lovingly improves each book to an incredible standard.

WEB DESIGN

...With Sole Traders & Ciaoweb

Especially aimed at sole traders and SME's, Roberto runs Sole Traders Online to help new businesses get online fast. For just £10 a month, the service includes a domain name, email address, 3-5 pages on the website itself

and search engine optimization. A website could be your most important business asset, and with Roberto it works out as less than 33p a day to have a professionally designed website right at your fingertips.

Ciaoweb is another arm of Roberto's web design business, aimed at larger businesses wanting to develop their online presence.

The third string to Roberto's bow is VHS to digital DVD conversion, helping you to safeguard those older memories of holidays, christenings, weddings and more.

"Book restoration is an excellent way to bring your old books and bibles to life, not only will it keep those memories for longer but can also increase the financial value of the books themselves."
